About Ryan Publications Ltd

Who We Are and What We Do

Ryan Publications identified a gap in the market for supplemental workbooks that teachers could use, confident that the workbooks, created by extremely talented classroom practitioners, reinforce the skills learnt during lessons. They are equally useful for homework or at school.

Our value-for-money, write-on workbooks allow for independent work and are designed for use in mixed-ability classes, extension work, remedial work and ESOL classes. They are ideal for homework, exam revision, and relief lessons. We cover a range of subject areas: literacy, English, grammar, French, maths, science, and social studies (or civics).

We are driven by two passions: that students have access to resources that extend their learning and to reduce teachers workloads.
